Base Preparation

If installing your Best Way Stone Antico Storage Unit on an unstructured base, please ensure to follow these steps:

- Excavate area approx. 9 inches below grade.
- Excavate approx. 6 inches larger than your actual kit dimensions to ensure the base is stable.
- Fill with $\frac{3}{4}$ inch down limestone and compact firmly.
- Level out $\frac{1}{2}$ inch of sand and install kit as per the instruction guide.

If you are installing on a solid base such as an existing patio, base prep is not necessary. Please proceed to the first step.

These instructions may not refer to all base conditions. As this kit is incredibly heavy, base prep will greatly depend on existing ground conditions and may require alternate techniques.

Note: This manual was updated May, 2021.
